

Hornbrook Community Services District

Regular Meeting of April 25th, 2017

AGENDA SUPPORTING DATA

5. DISCUSSION AND ACTION ITEMS

- d. Discussion and Action regarding the purchase of security cameras and related equipment for the treatment plant.

Recommended Motion

Staff recommends that the Board discuss and take action on whether to purchase and install cameras and/or related security equipment at the treatment plant site.

Background

The water treatment plant is visible from Interstate 5, which leaves it vulnerable to theft or vandalism. It has become a concern of the district that members of the public have been seen taking photographs and video of the treatment plant and operating personnel, which in the public health/water supply industry is an extreme security concern from the perspective of potential terrorism or other acts. The treatment plant may be susceptible to having its water supply tampered with or otherwise affected. District Secretary Patricia Slote requested to add this item to the agenda for further discussion and possible action to increase the security of the plant and its personnel.
