

Hornbrook Community Service District

JULY 31, 2022 FIRE EMERGENCY

This is a Temporary Water usage only, until August 10, 2022. Emergency Water Usage Is For Protecting Your Home's During The Fires That Are Coming Toward Our Community of Hornbrook

You can use the water if the time comes to protect your homes and not to worry about being penalized, other than having to pay for the water. This is not to water your gardens, trees, lawns, wash vehicles, fill pools and spas. This is in case a fire threatens your home as the McKinney Fire grows in size.

We still have to be conservative as much as we can with the water. We are still in an extreme drought year. We have one tank, three wells that are working at this moment. We are waiting on PP&L to run power to well #5 to get it operational.

We, the Board, do not think anyone should have to use excessive water right now and waste it. Please be as conservative as you can during this time, but use what you need to keep your home's safe when the time comes. We are still in an extreme drought as most of California is. Let's all try to work together to get through this time and pray there is no more fires this year.

Thank You, the Hornbrook Community Service District Board. [
