**URGENT NOTICE CONSERVE WATER**  
**To The Water Customers**  
**Hornbrook CSD Public Water System**

**There is a lower amount of water in our storage tank** at this time and we are very concerned that the supply cannot keep up with the demand without emergency conservation efforts. We are running all three pumps at this time and are checking out the water levels on the three wells.

**Therefore**, we are asking that residents Of Hornbrook conserve water until storage tank is filled or a leak is found or repaired. Please check your water lines on your property and make sure you do not have a water leak and if you would please let us know by calling the water plant and leave a message let us know by calling 530-475-3730.

In the meantime please help conserve water by:

**Take shorter showers.**

**Fix leaks.**

**Turn off the faucet when brushing teeth.**

**Limit landscape irrigation.**

**This Water Conservation Notice will be rescinded after well production and water production is restored and the water storage tank has been filled.**

Thank you, HCSD
